Meditation Retreat

with Dr Joe Dispenza

During this five-night meditation retreat with Dr Joe Dispenza, participants will hear profound new teachings that will challenge their belief of what the human mind and body can achieve. They will learn how to transform self-limiting thoughts, unconscious habits, and memorized emotions that keep people anchored to their past.

By understanding the science behind transformation, attendees will have the necessary tools to step outside their personal reality into a new life. Dr Joe has educated thousands of people in how they can re-wire their brains and re-condition their bodies to making lasting changes.

This is a unique opportunity for people to retreat from their routine life, away from familiar stimuli, and begin to create a new reality. Dr Joe will take the group through a series of daily interactive exercises, discussions and several meditations that will deepen the practice and process of change.
